## RELEVANT EXPERIENCE

### GITHUB REPOSITORIES

- Implemented an api fetch of my github portfolio from github api using react-query
- Implemented Pagination using the Javascript slice method.
- Used framer-motion for animations.
- Implemented react-router in routing each repository for further information and also in handling 404 Error.
- Implemented react-error-boundary in handling JavaScript errors anywhere in their child component tree, log those errors, and display a fallback UI.
- Implemented a search functionality to enable searching for any repository.

### REDACTR

- Collaborated with other team members in building an app that helps people safely share content on social-media by scrambling portions they don't want people to see.
- Got really familiar with string manipulations and JavaScript methods available to strings.

### DRUM MACHINE.

- Used the audio web api in playing sounds
- Used key event listeners in getting the buttons to play different audios

## EXPERIENCE

2018 – 2021

### **PRODUCTION MANAGER,** HYCAL LTD

- Ensured customer orders are completed on time and to budget and that quality standards and targets are met
- Worked with managers to implement the company's policies and goals
- Collated and analyzed data, putting together production reports for both factory managers customers
- By ensuring a consistency in product quality product sales increased more than 100% within 6 months.

2016-2017

### **TEACHER,** UNG/RANA SECONDARY SCHOOL KADUNA

- Created a press club to encourage reading and writing culture in the school
- Served as a subject teacher in charge of taking students lessons in Chemistry.
- Created student syllabus, outlines and lesson notes on the subject.
- Administered tests and marked assessments and examination scripts.
