RELEVANT EXPERIENCE

APRIL 2022 – PRESENT

FRONTEND STUDENT, ALTSCHOOL AFRICA

GITHUB REPOSITORIES

- Implemented an api fetch of my github portfolio from github api using react-query
- Improved the page by Paginating using the Javascript slice method.
- Animated the page using framer-motion for animations to engage users or visitors of the page resulting in a 100% positive remark.
- Implemented react-router in routing each repository for further information and also in handling 404 Error.
- Safe-guarded the page against blank page when error occurs by implementing react-error-boundary in handling JavaScript errors anywhere in their child component tree, log those errors, and display a fallback UI.
- Implemented a search functionality to enable searching for any repository.
- Lazy loaded each page to help improve performance by 65%.

HACKATHON

- Collaborated with other team members in building an app that helps people safely share content on social-media by scrambling portions they don't want people to see.
- Led the team in also building a dashboard that reflects total population, student tracks, and gender with chart visualizations for each categories. In doing so my team was top 10 out of more than 500 teams that participated.

- Got really familiar with string manipulations and JavaScript methods available to strings.

OUREDEN CLONE

- Built a clone of the ouredenlife website, a company that offers leading services in cleaning, laundry and food using react, scss and react-query.
- Got familiar with creating reusable components to avoid code repetitions and improve working speed and readability
- Implemented code splitting to improve performance by 60%
- Improved my ability in paying attention to details and building pixel perfect websites.
